Work Experience

Software Engineer (Contractual)   Nov 2023 – Jun 2025
Syrincal Trading, OPC   Bulacan, PH

- Contracted to develop a scalable B2B ordering platform, integrating supply chain, inventory management, and delivery tracking into one unified system with the goal of improving operational efficiency and reduced order processing time
- Acted as the principal engineer and system architect responsible for end-to-end development, deployment, and maintenance of the company's unified B2B ordering platform
- Served as the primary technical point of contact between the operations team and the product management team, ensuring business-process alignment and scalability
- Managed iterative releases, documentation, and long-term maintainability strategy

Full Stack Developer (Internship)   Jan 2025 – Apr 2025
Bone Fix Metal Craft Inc.   Metro Manila, PH

- Developed a full-stack PHP-based custom CMS with admin dashboard, enabling the product team to manage orthopedic implant data and physicians to access clinical information and usage guidelines on-demand. This replaced manual data request workflows with a centralized digital platform improving data accessibility
- Implemented Role-Based Access Control (RBAC) with admin-exclusive account provisioning, ensuring only authorized physicians could access the platform through unique, admin-issued credentials — eliminating open registration and safeguarding confidential data

Web Developer (Freelance)   Sep 2024 – Dec 2024
D.R.A. Jewelry   Bulacan, PH

- Delivered a mobile-first, fully responsive product catalog website using React and Tailwind for a local jewelry business, with the goal of enhancing online visibility and brand presentation
- Implemented SEO best practices to boost organic visibility, set up Google Analytics to track user behavior and guide future optimizations, and integrated a private consultation scheduler
- Delivered the project end-to-end — from UI/UX design, development, and deployment — within a 3-month contract, aligning technical execution with the client's digital marketing goals

Projects

OJTfolio – Internship Progress Tracker   **Next.js | Supabase | OAuth**
Built a SaaS tool for on-the-job training students to log daily progress, upload documentation, and auto-generate weekly reports—streamlining compliance tracking and report submission.

E-Registrar – Capstone Project   **React | Electron | Firebase**
Developed a desktop app with kiosk support and real-time email notifications to optimize student service flow in registrar offices—reducing wait times and improving operational throughput

Education

Our Lady of Fatima University   July 2025
Bachelor of Science in Information Technology

Certificates

- **IBM Front-End Developer**
- **Meta Front-End Developer**
- **Google Project Management**
- **IBM Full-Stack JavaScript Developer**
- **US-ASEAN STIC Industry Professional Credentials Track**
